

Town of Saratoga

System Pressure Advisory!

The Town of Saratoga water consumers may be experiencing periods of low pressure and outages in the distribution system due to a broken water main.

Periods of low or no pressure in the distribution system increase the potential for back siphonage and introduction of bacteria into the water system.

Therefore, when water service is restored, consumers are advised to **boil all water** used for human consumption (including, drinking, making ice, brushing teeth, washing dishes and food preparation) or use bottled water.

Vigorous boiling for one (1) minute should kill any disease-causing organisms that may be present in the water.

System flushing will begin immediately following completion of repairs. You MAY experience discolored water until tomorrow. Bacteria samples will be collected and analyzed overnight.

This advisory remains in effect until test results are available tomorrow. An update will be provided tomorrow.
